champagnotta exclusive

Restrained height and a slender neck, in these words, a revolution. Vetreria Etrusca has designed this champagne in anticipation of requests from the international market and the largest producers of sparkling wines. The imposing body in the design of a truncated cone combined with a narrow and slender neck produces a bottle of great character for high quality sparkling wines. The design is highlighted by the beautiful colour of Verdetrusco®: glass only in 750ml. Carefully Made in Italy.
