

vino lok: new bottle closure system

Vino Look is the new bottle closure system developed by Alcoa CSI Deutschland (www.vino-lok.de). The main feature of the new cap, an alternative to the traditional cork, is the coupling of a glass body with a seal ring made from ethylvinylacetate (Elvax). The two materials ensure a perfect sealing while at the same time preventing moulds, unpleasant flavours, leaving no aftertaste and odours. The stopper, once the protective coating (capsule) is removed, is easy to extract and when it is reinserted it adheres perfectly to the opening specifically designed by Vetreria Etrusca.

Borgognotta Armonia, Bordolese Storica Extra, Bordolese Giulia and Bordolese Medicea These four beautiful bottles with 750ml capacity in stunning Verdetrusco® green feature this new sealing system.
